Notice of Consideration of No Further Action

Transco Transmission
1470 Santa Rosa Avenue
Santa Rosa
Case No. 1TSR131

Internet Posting Date: 06/12/08

End of Comment Period: 30 days from date of Internet posting, on site posting and public notice distribution

This notice invites the public to review and comment on the pending decision to require no further action regarding petroleum releases at 1470 Santa Rosa Avenue in Santa Rosa, California.

Problem Description:

Two underground storage tanks were removed in January 1990 including one 500-gallon waste oil tank and one 500-gallon gasoline tank. Soil and groundwater impacts were noted at both tank locations. The tanks were removed from separate tank pits located approximately 50-feet apart.

Corrective Action:

Impacted soil was removed to the extent practicable at the waste oil tank location in March 1990 and at the gasoline tank location in November 2007. Impacted groundwater was also purged from the open gasoline tank excavation in 2007. The extent of groundwater contamination was defined via the drilling of soil borings and installation of numerous groundwater monitoring wells.

Status of Contaminants in Groundwater

Groundwater impacts in the vicinity of the former waste oil tank consist of transmission fluid at 710 ug/l and are limited to the area of one monitoring well. Petroleum and chlorinated hydrocarbon groundwater impacts remain. However, the record contains evidence of on site migration of discharges from adjacent properties.

Regional Water Board staff intends to concur with no further action at the end of the 30-day public notice period unless comments and/or new information is submitted demonstrating that this case does not meet the requirements of no further action. If you would like to review the case file, appointments are recommended and can be scheduled by calling (707) 576-2220. Please contact Joan Fleck at (707) 576-2675 or e-mail, Jfleck@waterboards.ca.gov with any questions or comments. Written comments may be sent to the attention of Joan Fleck.
